ChatGPT

We've been busy. Here's what's new.

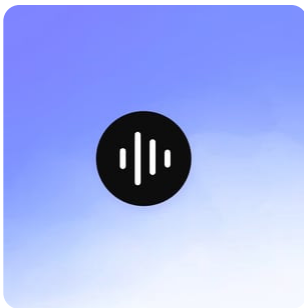

From bringing your imagination to life with Images 2.5, to thinking out loud with the new Voice mode, to pushing the boundaries of what's possible with GPT-6 Astra—there's plenty to explore.

[Try Images 2.5](#)

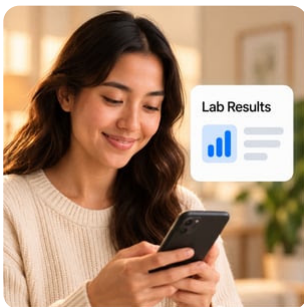

New photo. Wrong decade.

Try big '80s hair or a '90s album-cover look. Different era. Unmistakably you.

[Go back in time](#)

Say hello to the new Voice

Practice a language, rehearse for a presentation, or simply think out loud—just by talking to the new ChatGPT Voice.

[Try Voice](#)

Make sense of your health

Explore sleep and activity patterns, understand lab results, and prepare for appointments. Connect Apple Health or supported medical records to get started.

[Explore Health](#)

Your party starts with the invite

Throwing a birthday, dinner party, or backyard bash? Turn your theme into a custom invitation with ChatGPT Images 2.5.

[Create your invite](#)

A big leap forward

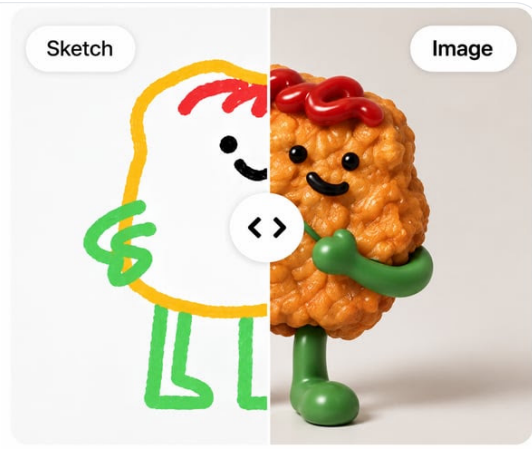

Meet GPT-6 Astra—a leap forward in intelligence, opening new possibilities for what we can imagine, create, and discover.

[See what's possible](#)

Just for fun

Your sketch is the inspiration.
ChatGPT turns it into a finished
product—with richer textures, natural
lighting, and details you can refine.
